

AFL-CIO HOUSING INVESTMENT TRUST

COMPETITIVE RETURNS | UNION CONSTRUCTION JOBS | HOUSING FINANCE

Performance Commentary | January 2024

For January 2024, the AFL-CIO Housing Investment Trust (HIT) had a gross return of 0.07% and a net return of 0.04%. Its benchmark, the Bloomberg U.S. Aggregate Bond Index* (Bloomberg Aggregate or Benchmark), reported a return of -0.27% for the month.

The performance data quoted represents past performance and is no guarantee of future results. Periods over one year are annualized. Investment results and principal value will fluctuate so that units in the HIT, when redeemed, may be worth more or less than the original cost. The HIT's current performance data may be lower or higher than the performance data quoted. Performance data current to the most recent month-end is available from the HIT's website at www.aflcio-hit.com. Gross performance figures do not reflect the deduction of HIT expenses. Net performance figures reflect the deduction of HIT expenses and are the performance returns that HIT's investors obtain. Information about HIT expenses can be found on page 1 of the HIT's current prospectus.

Positive contributions to HIT's relative performance vs. Bloomberg Aggregate* included:

- Its ongoing yield advantage. As of January 31, HIT's portfolio yield was 5.35% versus 4.61% for the Benchmark, offering a yield advantage of 74 bps.
- The portfolio's underweight to agency-insured, fixed-rate single family MBS, the worst performing major asset class in the Benchmark on an excess and total return basis. The HIT's portfolio was underweight to the sector at month end, with a 13.6% allocation compared to 26.3% in the Bloomberg Aggregate.
- Performance by FHA/Ginnie Mae permanent loan certificates (PLCs) and FHA/Ginnie Mae construction loan certificates (CLCs) in the HIT's portfolio as nominal spreads to Treasuries tightened by approximately 4 bps and 3 bps, respectively. The HIT portfolio had an allocation of 12.2% to PLCs and 5.1% to CLCs at the end of the month while there were no such securities in the Bloomberg Aggregate.

- Performance by longer maturity, fixed-rate agency multifamily MBS in the HIT's portfolio as their nominal spreads to Treasuries tightened. Spreads on Fannie Mae DUS security structures (benchmark 10/9.5s) tightened by approximately 2 bps. The HIT portfolio had an allocation of 24.3% to fixed-rate single-asset Fannie Mae DUS securities at the end of the month while the Benchmark had none.

Negative impacts to HIT's relative performance vs. Bloomberg Aggregate* included:

- The portfolio's underweight to corporate bonds, the best performing major sector for the month on an excess return basis, at 44 bps. The HIT does not invest in corporate bonds, whereas the sector comprised 24.9% of the Benchmark on January 31, 2024.
- The portfolio's overweight to the highest credit quality sectors (i.e. AAA- and AA-rated) of the investment grade universe, whose excess returns of 28 and -5 bps were the lowest among the four credit ratings buckets (AAA, AA, A and BBB) of the Bloomberg Aggregate. Approximately 93.7% of the HIT portfolio carried a government or GSE guarantee or was rated AA or better, compared to 75.7% for the Bloomberg Aggregate.
- Performance by Ginnie Mae REMIC structures in the HIT's portfolio as spreads to Treasuries widened by approximately 9 bps during the month. On January 31, 2024, the portfolio had a 11.5% allocation to REMICS while the Benchmark had none.
